Licensure Disclosure

In compliance with U.S. Department of Education regulations. SATC provides information pertaining to professional licensure and certification for all relevant programs.

Professional Licensure Requirements May Vary State to State

SATC's nursing programs lead to professional licensure within the State of Kansas as well as potentially, other states. Specific amounts of training is required as well as passage of an end of program exam. Students are highly encouraged to obtain their professional license in Kansas. Kansas is a member of the Nurse Licensure Compact, which enables nurses with a multi-state license to practice in other participating states without having to obtain additional licenses.

What All Students in Licensure Programs Should Do

Prior to enrolling in the either SATC nursing program, prospective students living and/or working outside of the United States should confirm with the appropriate licensing or certifying agency whether successful completion of an SATC nursing program will meet the credentialing requirements of the country in which they intend to seek employment.

Students should review the specific requirements for the program in which they are enrolling, including those related to practicum/internships as well as pre-qualifications for licensure, such as the need for a criminal background check.

SATC strongly recommends that students contact the applicable licensure board(s) in their state of residence or in the state where they intend to obtain a license before beginning an academic program that results in licensure and prior to beginning any practicum/internship.
